

# ANUSHA N

## DEVOPS ENGINEER

I am a highly motivated, skilled and self-organized DevOps Engineer with almost 3 years of experience and passionate about learning new technologies and best practices in DevOps and cloud management, and also, I am always eager to collaborate with other professionals and teams. I am an enthusiast, hungry to learn and easily adaptable. Seeking a technical position to fully utilizing strong customer service attitude, exceptional organizational ability and technical skills. My goal is to use my skills to contribute to the growth and success of the organization.

### PROFILE SUMMARY

- Having almost **3 Years** of Professional experience in **AWS, Azure, Kubernetes, Docker, Terraform, and CI/CD**. Strong expertise in cloud infrastructure, automation, monitoring, and maintaining highly available production environments.
- Provide up-to-date and accurate documentation on the SCM environment and process automation tools.
- Monitoring computer systems and building alerts for various operational issues that computer system can experience.
- Build software and systems to manage platform infrastructure and applications.
- Experience in writing scripts in **Shell Scripting** and **Bash** to automate deployments.
- Experience in deploying and configuring **GIT** repositories with branching, tagging, notifying.
- Extensively worked on **Jenkins** for continuous integration and for end-to-end automation for all build and deployments.
- Managing **Continuous Integration** and **Continuous Delivery** (CI/CD) using **Jenkins** and release management using **SonarQube**.
- Experiencing on provisioning the infrastructure using **Terraform**.

### CERTIFICATIONS

- AZ-400: Designing and Implementing Microsoft DevOps Solutions**
- AZ-104: Microsoft Azure Administrator – KodeKloud**
- Jenkins – KodeKloud**
- Git Version Control Training – KodeKloud**
- Python Internship – Techno Fly Solutions**

### EXPERIENCE

#### EITB GLOBAL INFO SOLUTIONS PVT LTD

MAR-2026 TO PRESENT

ROLE: **DEVOPS ENGINEER**

PROJECT: **CA APPLICATION PORTFOLIO MANAGEMENT (CA-APM)**

ENVIRONMENT: **MICROSOFT AZURE, AZURE DEVOPS, AZURE PIPELINES, LINUX (UBUNTU/CENTOS), CLOUDFLARE, DNS, CDN, SSL/TLS, APACHE, NGINX, CPANEL, PYTHON, BASH, CRON, SPRING BOOT, JAVA, REST APIS, JAVASCRIPT, MYSQL, SMTP, GIT, JIRA**

#### ROLES & RESPONSIBILITIES:

- ❖ Managed and maintained **Microsoft Azure** production environments, ensuring high **application availability** through proactive **monitoring, incident management, performance optimization**, and infrastructure support.
- ❖ Designed, implemented, and maintained **Azure DevOps CI/CD Pipelines**, automating **build, testing, and deployment** processes, reducing deployment time by **40%** and improving release efficiency.
- ❖ Administered **Linux (Ubuntu/CentOS)** production servers by performing **patch management, configuration management, security hardening, user management, and performance tuning**, reducing system downtime by **30%**.
- ❖ Configured and managed **Cloudflare** services including **DNS, CDN, SSL/TLS, Caching, WAF, and Security Policies**, improving website response time by **25%** while enhancing application security.

- Experiencing on provisioning the infrastructure using **Terraform**.
- Understanding of infrastructure automation using **Docker** and **Ansible**.
- Experience in monitoring the application servers using **Prometheus** and **Grafana**.
- Experience with container-based deployments using **Docker**, working with **Docker images**, **Docker Hub** and **Docker Registries**.
- Knowledge in trouble shooting and automated deployment to web and application servers like **Tomcat** and **Nginx** over **AWS** and **AZURE Cloud**.
- Experience in using **Kubernetes** to provide a platform for automating deployment, scaling, and operations of application containers across clusters of hosts.
- Good knowledge and Working with Cloud Platform like **Amazon Web Services (AWS)** and good knowledge in using various services like **AWS EC2, VPC, S3, IAM, EBS, Elastic Load Balancers, Auto Scaling, RDS**.
- Extensive experience in using build automation tools like **Maven** for building of **JAR, WAR** and **EAR** files.
- Involved in active scrum calls of every day as part of regular updates.
- Provided 24x7 production support and development environments.
- Ability to communicate requirements effectively to team members and manage applications.
- Ability to learn and master new technologies and deliver tasks in short deadlines. Possess strong communication and teamwork skills and thrive in a fast-paced, dynamic work environment.

## EDUCATION

2019 - 2022

### GOVERNMENT POLYTECHNIC FOR WOMEN

- DIPLOMA IN COMPUTER SCIENCE & ENGINEERING

- ❖ Managed **Domain Lifecycle, DNS Records, SSL Certificate** provisioning, and renewals using **Cloudflare** and **cPanel**, achieving **100% on-time SSL certificate renewals** and uninterrupted service availability.
- ❖ Automated **Website** and **MySQL Database Backups** using **Python, Bash Scripting, and Cron Jobs**, reducing manual effort by **80%** and improving **Disaster Recovery (DR)** readiness.
- ❖ Configured and maintained **SMTP Infrastructure** for application email notifications, ensuring **99% email delivery success** and reliable communication services.
- ❖ Utilized **Jira** for **Incident Management, Change Management, Release Coordination, and Production Support Activities**, improving deployment coordination and team collaboration by **20%**.
- ❖ Designed and developed a **Website Uptime Monitoring Application** using **Spring Boot, Java, REST APIs, JavaScript, MySQL, and SMTP**, enabling automated **Health Checks** and **Real-time Email Alerts**, reducing incident response time by **60%**.
- ❖ Performed **Production Monitoring, Log Analysis, Root Cause Analysis (RCA)**, and Troubleshooting to resolve production issues, ensuring high system reliability and minimal downtime.

## TEXIO GLOBAL PRIVATE LIMITED

OCT-2022 TO MAR-2025

ROLE: **DEVOPS ENGINEER**

ENVIRONMENT: **AWS,AZURE,AZURE PIPELINES, JENKINS,DOCKER,KUBERNETES,TERRAFORM, PROMETHEUS,GRAFANA,DYNATRACE,SQUARED UP,PYTHON,GIT,LINUX,YAML**

### ROLES & RESPONSIBILITIES:

- ❖ Managed multi-cloud production infrastructure across **AWS** and **Microsoft Azure**, ensuring **99.9% application availability** through proactive monitoring, incident management, and infrastructure optimization.
- ❖ Designed, implemented, and maintained **Azure DevOps CI/CD Pipelines**, automating **build, test, and deployment** workflows, reducing deployment time by **50%** and improving release efficiency.
- ❖ **Containerized** applications using **Docker** and deployed them to **Kubernetes** clusters, reducing deployment failures by **35%** while improving application portability and scalability.
- ❖ Provisioned and managed cloud infrastructure using **Terraform (Infrastructure as Code - IaC)**, automating resource provisioning and reducing infrastructure deployment time by **60%**.

## TECHNICAL SKILLS

- Cloud Platforms: **AWS, Microsoft Azure**
- CI/CD Tools: **Azure DevOps, Azure Pipelines, Jenkins, GitLab CI/CD, GitHub Actions**
- Containers & Orchestration: **Docker, Kubernetes**
- Infrastructure as Code (IaC): **Terraform**
- Version Control: **Git, GitHub, GitLab, Azure Repos**
- Monitoring & Logging: **Dynatrace, Datadog, New Relic, AWS CloudWatch, Prometheus, Grafana**
- Scripting & Automation: **Python, Bash, AWS Lambda**
- Networking: **DNS, SMTP, SSL/TLS, Cloudflare CDN, AWS Route 53**
- Database: **MySQL**

- ❖ Configured and managed **AWS VPC, Subnets, Route Tables, Internet Gateways, Elastic Load Balancers (ELB), and Security Groups**, improving network reliability, security, and application availability.
- ❖ Implemented infrastructure and application monitoring using **Prometheus, Grafana, Dynatrace, and SquaredUp**, creating dashboards and alerts that reduced incident detection time by **40%**.
- ❖ Automated **AWS EC2** instance scheduling using **AWS Lambda (Python)** and **Amazon EventBridge**, optimizing cloud resource utilization and reducing infrastructure costs by **25%**.
- ❖ Collaborated with **Development, QA, and Release Management** teams to support production deployments, implement **environment-specific configurations**, and reduce deployment-related issues by **30%**.
- ❖ Built, optimized, and maintained **Docker Images** using **Dockerfiles**, reducing image size by **20%** and improving deployment consistency across environments.
- ❖ Deployed and managed **containerized workloads** on **Kubernetes**, performing **Rolling Updates, Replica Set Management, Auto Scaling, and Load Balancing** to achieve **zero unplanned downtime**.
- ❖ Administered **Jenkins** build agents and optimized **CI/CD Pipelines**, reducing build execution time by **35%** and increasing pipeline success rate to **98%**.
- ❖ Performed **production monitoring, log analysis, troubleshooting, and Root Cause Analysis (RCA)** to resolve infrastructure and application issues while ensuring high system availability.

## DECLARATION

I solemnly declare that all the above information is true and correct to the best of my knowledge and belief.
