

ANUSHA N

DevOps Engineer

anushakn041@gmail.com | +91 7892270344 | linkedin.com/in/anushanarayanawaswamy | Anushanarayanawaswamy.github.io

OBJECTIVE

DevOps Engineer with 3+ years of IT experience and hands-on experience in AWS, Azure, CI/CD, Docker, Kubernetes, Terraform, Linux, and automation. Experienced in designing, deploying, and managing cloud infrastructure while improving deployment efficiency, system reliability, and production stability.

PROFILE SUMMARY

- Designed and maintained CI/CD pipelines using Azure DevOps, Azure Pipelines, Jenkins, and GitHub Actions, reducing deployment time by up to 50% across multiple environments.
- Managed multi-cloud production environments across AWS and Microsoft Azure, maintaining 99.9% application availability through proactive monitoring and incident response.
- Administered network infrastructure including DNS, firewalls, load balancers, VPC, and Security Groups, improving network reliability and application security.
- Implemented monitoring and alerting solutions using Prometheus, Grafana, Dynatrace, and AWS CloudWatch, reducing incident detection time by 40%.
- Configured Cloudflare, SSL/TLS, and CDN settings to improve website performance and security, achieving 100% on-time certificate renewals.
- Supported healthcare application infrastructure, ensuring secure and reliable network connectivity between application, database, and web tiers.
- Collaborated closely with development and QA teams using Jira to coordinate releases, incidents, and operational tasks.

TECHNICAL SKILLS

Cloud Platforms	AWS, Microsoft Azure
Operating Systems	Linux, Windows
CI/CD Tools	Azure DevOps, Azure Pipelines, Jenkins, GitLab CI/CD, GitHub Actions
Infrastructure as Code	Terraform
Containerization & Orchestration	Docker, Kubernetes
Version Control	Git, GitHub, GitLab, Azure Repos
Monitoring & Logging	Dynatrace, Datadog, New Relic, AWS CloudWatch, Prometheus, Grafana
Networking & Security	DNS, Firewalls, Load Balancers, VPC & Security Groups, SMTP, SSL/TLS, Cloudflare CDN, AWS Route 53
Scripting & Automation	Python, Bash, AWS Lambda

Database	MySQL
Ticketing Tools	Jira

PROFESSIONAL EXPERIENCE

EITB Global Info Solutions Pvt Ltd Chennai
DevOps Engineer

March 2026 – July 2026

- Managed Microsoft Azure production environments, ensuring 99.9% application availability through proactive monitoring, incident response, and performance optimization.
- Designed and maintained Azure Pipelines (CI/CD), reducing deployment time by 40% and improving release efficiency.
- Administered Linux production servers, reducing system downtime by 30% through patching, configuration management, and performance tuning.
- Configured and managed Cloudflare, DNS, CDN, and SSL/TLS, improving website response time by 25% while enhancing application security.
- Managed domain lifecycle, DNS records, and SSL certificate renewals using Cloudflare and cPanel, achieving 100% on-time certificate renewals.
- Automated website and database backups using Python, Bash, and Cron, reducing manual effort by 80% and improving recovery readiness.
- Implemented SMTP infrastructure for application notifications, achieving 99% email delivery success.
- Utilized Jira to manage production incidents, operational tasks, and release activities, improving deployment coordination by 20%.

Narayana Health Insurance Ltd, Bangalore
Junior Executive

April 2025 – October 2025

- Managed network connectivity for healthcare applications, ensuring secure and reliable communication between application, database, and web servers.
- Configured and troubleshot DNS, firewall rules, and load balancers to maintain high application availability.
- Monitored network performance and resolved latency, packet loss, and connectivity issues using monitoring and diagnostic tools.

Texiio Global Private Limited, Bangalore
DevOps Engineer

October 2022 – March 2025

- Designed and maintained Azure DevOps CI/CD Pipelines, reducing deployment time by 50%.
- Provisioned infrastructure using Terraform, reducing provisioning time by 60% through Infrastructure as Code (IaC).
- Configured and managed AWS VPC, Subnets, Load Balancers, and Security Groups, improving network reliability by 30%.
- Implemented monitoring and alerting using Prometheus, Grafana, Dynatrace, and SquaredUp, reducing incident detection time by 40%.
- Automated AWS EC2 instance scheduling using AWS Lambda (Python) and Amazon EventBridge, reducing cloud infrastructure costs by 25%.
- Collaborated with development teams to support release activities and implemented environment-specific configurations, reducing deployment-related issues by 30%.

EDUCATION

Diploma in Computer Science & Engineering
Government Polytechnic for Women, Bangalore

CERTIFICATIONS

- AZ-400: Designing and Implementing Microsoft DevOps Solutions
- AZ-104: Microsoft Azure Administrator – KodeKloud
- Jenkins – KodeKloud
- Python Internship – Techno Fly Solutions
